Avantis Global Equity UCITS ETF USD ACC ETF (IE000RJECXS5) a Fund of American Century ICAV

This Fund is managed by Waystone Management Company (IE) Limited

Objectives and Investment Policy

Investment Objective

The investment objective of Avantis Global Equity UCITS ETF (the "Fund") is to seek long-term capital appreciation through investment in an actively managed portfolio of equity and equity-related securities issued by large, mid and small capitalisation companies in developed countries.

Investment Policy

The Fund will seek to achieve its investment objective by investing in a global portfolio of equities and equity-related securities, common shares, convertible stock, preferred shares, rights issues, equity warrants which will not embed derivatives, stock options and closed-ended investment funds including commercial trusts and real estate investment trusts ("REITs") and publicly traded partnerships. The Fund intends to invest up to 100% of its Net Asset Value in equities and equity-related securities of issuers located in developed countries.

The Fund may invest up to 5% of its NAV in REITs which are pooled invest vehicles that invest in income producing real property or real property-related loans or interests listed, traded or dealt in on recognised stock exchanges.

The Fund may invest up to 10% of its Net Asset Value in the units/shares of Eligible Collective Investment Schemes where such investments satisfy the requirements of the Central Bank.

In exceptional market or economic conditions, the Fund may temporarily invest up to 100% of its NAV in cash, cash equivalents, and ancillary liquid assets. These assets may include deposits, Investment Grade short-term debt securities, variable rate notes, money market instruments, and convertible bonds from various issuers listed on any regulated market.

Convertible bonds, convertible into a company's equity, will only be held due to corporate actions and will be sold as soon as practicable. The Fund will not invest in contingent convertible bonds.

Benchmark

The Fund is an actively managed exchange traded fund (ETF). The Fund does not seek to replicate the performance of a specified index but does reference the MSCI World IMI Index (the "Benchmark") for comparative purposes only. Further information on the Benchmark can be found at www.msci.com.

Subscription and Redemption

The shares are listed on one or more stock exchanges and may be traded in currencies other than their base currency. The performance of your shares may be affected by this currency difference. Your shares will be denominated in USD, the Fund's base currency. In normal circumstances, only authorised participants (e.g. select financial institutions) may deal in shares (or interests in shares) directly with the Fund. Other investors can deal in shares (or interests in shares) daily through an intermediary on stock exchange(s) on which the shares are traded. Please refer to the Fund's Prospectus for more information.

Income

Your shares do not pay income, but instead the Fund reinvests such income to grow your capital.

Fund Currency

The reference currency of the Fund is USD.

Investment Horizon

Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

Why is this Sub-Fund in this category?

The risk category for this Fund is set at 6. It is calculated in line with EU regulations and is based on the risk limit for the Fund.

Risk Disclaimer

A **category 1** Fund is not a risk-free investment - the risk of losing your money is small, but the chance of making gains is also limited. With a **category 7** Fund, the risk of losing your money is high but there is also a chance of making higher gains. The seven-category scale is complex. For example, a category 2 Fund is not twice as risky as a category 1 Fund. The risk category shown is not guaranteed and may change over time.

Are there any other particular Risks?

Settlement, Credit, and Liquidity Risks: The trading and settlement practices of some of the stock exchanges or markets on which a

relevant Fund may invest may not be the same as those in more developed markets, which may increase settlement risk and/or result in delays in realising investments made by a Fund. Those exchanges and markets may also have substantially less volume and generally be less liquid than those in more developed markets.

Regulatory Risks and Accounting Standards: Disclosure and regulatory standards may be less stringent in certain securities markets than they are in developed countries and there may be less publicly available information on the issuers than is published by or about issuers in such developed countries. The valuation of assets, depreciation, exchange differences, deferred taxation, contingent liabilities and consolidation may also be treated differently from international accounting standards.

Political Risks: Fund performance may be influenced by economic and market changes, political developments, government policy changes, capital transfer restrictions, and legal, regulatory, and tax changes. There are also risks of expropriation, nationalisation, confiscation of assets, and changes in foreign ownership laws.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

Charges for this Fund

The charges you pay are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.
